

General

Will your products work with an IBM i/OS version upgrade?

All currently supported versions of our software are compatible with all IBM i OS and OS/400 above version V5R4. ProData is part of IBM's Partners in Development which gives us advanced information concerning IBM i OS upgrades. We would recommend that you use the currently supported version of any of our software products with the latest release updates applied when upgrading to a new OS level.

For assistance in determining the currently supported version of software and the latest release updates, please contact our Technical Support staff at: help@prodatacomputer.com or call our Customer Service group at 1.800.228.6318.
