

DBUnifier

Can the same DBUnifier Application be used for both updating of data and inquiry only?

Yes. You can launch a DBUnifier Application in any one of the following modes.

- *INQUIRY – Allows only inquiry
- *UPDATE – Allows Inquiry and Update. No Record Deletes or Record Inserts.
- *FULL – Allows Inquiry, Update, Inserting and Deleting of Records.
- *NODELTE – Allows Inquiry, Update, and Inserting of Records.
