RDR

Can RDR be submitted to batch?

Yes, RDR retrieves all deleted records from a file. Here's how:

1. Enter the command SBMJOB on a command line and press F4 to prompt.

2. Enter the command RDR into the first parameter 'Command to run' and press F4 to prompt.

3. When the RDR command comes up, enter the File to retrieve deleted records from and change the parameter for 'Output Library Name:' to a library other than QTEMP, then press enter.

4. When the screen returns to the SBMJOB command prompt, enter a 'Job name' and any other information you feel is necessary and press enter.
